Technical Skills

AI

- Claude Code
- Kiro (AWS)
- Spec Driven

Front-end

- JavaScript, TypeScript
- React.JS, Vite
- Tailwind
- HTML, CSS

Back-end

- C#, .Net
- Python FastAPI
- AWS
- SQL, NoSQL, MSSQL,
- REST API

Softwares

- Git, GitHub
- Jira, Confluence
- VS Community, VS Code
- Docker
- Linux, Windows

Summary

Full-stack software developer passionate about building modern, user-focused applications. I enjoy working across the stack, from crafting intuitive interfaces with React and TypeScript to developing back-end services with C# and AWS. I have experience modernizing legacy systems, building cloud-first applications, and creating AI-powered tools that improve development workflows. I value clean, maintainable code, thoughtful design, and continuously exploring new technologies to build better software.

Work History

Software Engineer

2024 - Present

Newforma, EleVia Software, Remote

Achievements

- Established the front-end foundation for a new cloud-first ERP application, building a reusable UI component library with 30+ production components adopted across the engineering team, reducing development time from weeks to minutes or hours.
- Led front-end architecture and development for the modernization of legacy enterprise software, replacing WinForms applications with a scalable React and TypeScript application.
- Developed and deployed back-end services using C#/.NET and AWS, integrating cloud services to support application workflows, communication, and infrastructure.
- Built proprietary AI agents and automation workflows to support spec-driven development, transforming engineering specifications into structured implementation plans, code, and automated tests.
- Contributed to product direction and delivery, translating business requirements into epics and user stories in collaboration with the software architect and product.
- Presented product demonstrations to stakeholders and management, showcasing new capabilities and communicating development progress.

Responsibilities

- Developed and maintained full-stack application features across front-end and back-end systems.
- Participated in architectural decisions, code reviews, testing, and technical documentation.
- Designed user interfaces and collaborated on UI/UX decisions to deliver intuitive user experiences.

Tech Stack

Front-end: React, TypeScript, Tailwind CSS, Figma
Back-end: C#, .NET, REST APIs
Cloud & Infrastructure: AWS (SQS, SES, S3, Lambda, DynamoDB, Cognito, CodePipeline, CodeArtifact)
Databases: Microsoft SQL Server, DynamoDB
AI & Developer Tools: Kiro, Claude Code, MCP, AI Agents
Tools & Practices: Git, GitHub, Jira, CI/CD, Spec-Driven Development, Automated Testing

Full-Stack Developer for AI Startup

2023 - 2024

Logiciels Hadaly Inc. @NextAi, Montreal, QC

Key Contributions:

- Led front-end architecture and development for two web applications (including mobile-responsive versions) using React, Next.js, and TypeScript, building scalable foundations from scratch.
- Collaborated with back-end engineers to integrate AWS RDS and deploy FastAPI services, ensuring efficient data flow and performance.
- Championed Agile practices, improving team productivity and accelerating delivery timelines.
- Introduced unit testing (Jest, Playwright), increasing code quality and reducing bug turnaround time.
- Delivered product demos to prospective clients, supporting business development and early product adoption.

Tech Stack:

React, Next.js, TypeScript, Tailwind, Python FastAPI, AWS, Git, Vercel, Jest, Playwright, HTML, CSS

Education

DEC: Computer Sciences - Video Game Programmer

2021 - 2023

Lasalle College, Montreal, QC

Development of Video Games in Unity and Unreal Engine.

Technical skills learned:

Agile, C# .NET, C++, Unity, Unreal Blueprints, Java, SQL

AEC: Computer Sciences - Full-Stack Java Developer

2020 - 2020

MCIT, Montreal, QC

Full-Stack development with Java and Oracle SQL

Technical skills learned:

- Java, SpringBoot, J2EE, Hibernate, SQL, HTML, CSS, JavaScript
